

Deploy Microsoft System Center with LDC

Dedicated Support
24/7 "on call" local support

InHouse Expertise
Certified Microsoft Experts in
Cloud Technology & Infrastructure

Proven Track Record
Partners to 100+ Clients across
multiple industries

With the growth of public, hosted, and hybrid cloud solutions, new challenges have emerged for IT management. Managing your IT infrastructure has become less about what's happening within your company's firewall and more about managing data and applications wherever they are. Without the right technology and tools these complex environments can quickly become costly and inefficient.

Streamline and automate IT service delivery and infrastructure deployment with Microsoft System Center. A holistic and comprehensive platform built to support seamless system management, be it on premise or in the cloud.

Included in System Center

Configuration Manager

Deploy software, protect data, monitor health, and enforce compliance across devices, including support for the latest Windows 10 features.

Virtual Machine Manager

Deploy and manage your virtualized, software-defined datacenter with a comprehensive solution for networking, storage, compute, and security.

Orchestrator

Automate your datacenter tasks; efficiently create and execute runbooks using native PowerShell scripts.

Operations Manager

Monitor health, capacity, and usage across applications, workloads and infrastructure, including Azure and Office 365.

Data Protection Manager

Protect your private cloud deployments, applications, and clients with ease.

Service Manager

Automated service delivery tool for incident resolution, change control, and asset lifecycle management.

Capabilities

1. Infrastructure Provisioning

Enterprise-class multi-tenant infrastructure for hybrid environments.

3. Automation

Application-owner agility, while IT retains control.

5. IT Service Management

Flexible service delivery

2. Infrastructure Monitoring

Comprehensive monitoring of physical, virtual, and cloud infrastructure.

4. Backup

end-to-end backup and recovery for private clouds, physical machines, clients and server applications.

About LDC

A cloud innovation specialist and renowned managed IT services provider (MSP) leading in IT and digital transformation in the Middle East since 1996. Partners with the world's top technology platforms, LDC is home to certified technology experts and infrastructure specialists with 100+ years of combined regional and local experience.
